DFO 89-43, Serial 9570

Chaney; withheld records, exemptions claimed

This copy of a record from Headquarters, from the xerox a remote generation, has the name of the agent in Dallas who had sent a memo on 9/4/75 blacked out. This makes it impossible to determine which memorandum of that day, quite aside from the impossibility of locating anything in the Headquarters file and being certain with only the date.

It instructs that Dallas interview Officer Jim Chaney immediately. It also orders a review of the files.

The record provided of the review of the files is not honest and no record of an interview has been provided.

Chaney was not interviewed by the FBI relating to the assassination of the President, apparently because his observations which were public were not wanted. He was interviewed in connection with Jack Ruby.
